

# Intelligent Remote Device Management & System Disaster Savior

## Real-time Analysis and Monitoring

SSD  
M.2 2242

PC/Phone/Tablet

Remote real-time analysis, monitoring and management of the health status of SSDs

**CoreAnalyzer2**  
**Tool for analyzing enterprise platform usage behavior**

By collecting data from an emulation of the client's host system, it analyzes equipment usage behavior and recommends the most suitable SSD for the system.

**SSDWidget 2.0**  
**Comprehensive SSD monitoring and maintenance software**

Can monitor SSD-related information and health status, and provide SSD lifespan and workload analysis.

## Immediate System Recovery

Without warning, an error or hacking attack interrupts normal operation ...

**Factory Automation**

**Pain point:**  
Production interruption and delays lead to customer dissatisfaction

**Medical Testing Equipment**

**Pain point:**  
Critical data loss leads to misdiagnosis

**ATM**

**Pain point:**  
System error or hack means cash is incorrectly dispensed

**Digital Signage**

**Pain point:**  
Timed ad campaign can't play on schedule, leading to refunds

**CoreSnapshot**  
**Recover an SSD's data and OS in just one second**

Full backup and recovery of SSD data can be performed in one second, which can instantly eliminate catastrophic system issues and prevent data damage or downtime translating into operational risks and losses.
