ECM-EHL-B1

Intel® Elkhart Lake 3.5" Micro Module

User's Manual

1st Ed –07 February 2023

FCC Statement

THIS DEVICE COMPLIES WITH PART 15 FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS:

(1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE.

(2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRED OPERATION.

THIS EQUIPMENT HAS BEEN TESTED AND FOUND TO COMPLY WITH THE LIMITS FOR A CLASS "A" DIGITAL DEVICE, PURSUANT TO PART 15 OF THE FCC RULES.

THESE LIMITS ARE DESIGNED TO PROVIDE REASONABLE PROTECTION AGAINST HARMFUL INTERFERENCE WHEN THE EQUIPMENT IS OPERATED IN A COMMERCIAL ENVIRONMENT. THIS EQUIPMENT GENERATES, USES, AND CAN RADIATE RADIO FREQUENCY ENERGY AND, IF NOT INSTALLED AND USED IN ACCORDANCE WITH THE INSTRUCTION MANUAL, MAY CAUSE HARMFUL INTERFERENCE TO RADIO COMMUNICATIONS.

OPERATION OF THIS EQUIPMENT IN A RESIDENTIAL AREA IS LIKELY TO CAUSE HARMFUL INTERFERENCE IN WHICH CASE THE USER WILL BE REQUIRED TO CORRECT THE INTERFERENCE AT HIS OWN EXPENSE.

Notice

This guide is designed for experienced users to setup the system within the shortest time. For detailed information, please always refer to the electronic user's manual.

Disclaimer

Avalue Technology Inc. reserves the right to make changes, without notice, to any product, including circuits and/or software described or contained in this manual in order to improve design and/or performance. Avalue Technology assumes no responsibility or liability for the use of the described product(s), conveys no license or title under any patent, copyright, or masks work rights to these products, and makes no representations or warranties that

these products are free from patent, copyright, or mask work right infringement, unless otherwise specified. Applications that are described in this manual are for illustration purposes only. Avalue Technology Inc. makes no representation or warranty that such application will be suitable for the specified use without further testing or modification.

Life Support Policy

Avalue Technology's PRODUCTS ARE NOT FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE PRIOR WRITTEN APPROVAL OF Avalue Technology Inc.

As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into body, or (b) support or sustain life and whose failure to perform, when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in significant injury to the user.

   2. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

A Message to the Customer

Avalue Customer Services

Each and every Avalue's product is built to the most exacting specifications to ensure reliable performance in the harsh and demanding conditions typical of industrial environments. Whether your new Avalue device is destined for the laboratory or the factory floor, you can be assured that your product will provide the reliability and ease of operation for which the name Avalue has come to be known.

Your satisfaction is our primary concern. Here is a guide to Avalue's customer services. To ensure you get the full benefit of our services, please follow the instructions below carefully.

Technical Support

We want you to get the maximum performance from your products. So if you run into technical difficulties, we are here to help. For the most frequently asked questions, you can easily find answers in your product documentation. These answers are normally a lot more detailed than the ones we can give over the phone. So please consult the user's manual first.

To receive the latest version of the user's manual; please visit our Web site at:
http://www.avalue.com.tw/

Product Warranty

Avalue warrants to you, the original purchaser, that each of its products will be free from defects in materials and workmanship for two years from the date of purchase.

This warranty does not apply to any products which have been repaired or altered by persons other than repair personnel authorized by Avalue, or which have been subject to misuse, abuse, accident or improper installation. Avalue assumes no liability under the terms of this warranty as a consequence of such events. Because of Avalue's high quality-control standards and rigorous testing, most of our customers never need to use our repair service. If any of Avalue's products is defective, it will be repaired or replaced at no charge during the warranty period. For out-of-warranty repairs, you will be billed according to the cost of replacement materials, service time, and freight. Please consult your dealer for more details. If you think you have a defective product, follow these steps:

1. Collect all the information about the problem encountered. (For example, CPU type and speed, Avalue's products model name, hardware & BIOS revision number, other hardware and software used, etc.) Note anything abnormal and list any on-screen messages you get when the problem occurs.

2. Call your dealer and describe the problem. Please have your manual, product, and any helpful information available.

3. If your product is diagnosed as defective, obtain an RMA (return material authorization) number from your dealer. This allows us to process your good return more quickly.

4. Carefully pack the defective product, a complete Repair and Replacement Order Card and a photocopy proof of purchase date (such as your sales receipt) in a shippable container. A product returned without proof of the purchase date is not eligible for warranty service.

5. Write the RMA number visibly on the outside of the package and ship it prepaid to your dealer.

ECM-EHL-B1 User's Manual

1. Getting Started

1.1 Safety Precautions

Warning!

Always completely disconnect the power cord from your chassis whenever you work with the hardware. Do not make connections while the power is on. Sensitive electronic components can be damaged by sudden power surges. Only experienced electronics personnel should open the PC chassis.

Caution!

Always ground yourself to remove any static charge before touching the CPU card. Modern electronic devices are very sensitive to static electric charges. As a safety precaution, use a grounding wrist strap at all times. Place all electronic components in a static-dissipative surface or static-shielded bag when they are not in the chassis.

1.2 Packing List

Before you begin installing your single board, please make sure that the following materials have been shipped:

- 1 x 3.5" ECM-EHL-B1 Micro Module
- 1 x CPU Heatsink
- 1 x Cable set contains the followings:
    — 1 x Serial ATA cable (7-pin, standard)
    — 1 x Wire SATA power cable (15-pin,2P/2.0mm)
    — 1 x Flat cable 9P(M)-PHD 10P/2.0mm)
- 3M foam (VHB-4622 10mm*20mm*1.1mm)

If any of the above items is damaged or missing, contact your retailer.

1.4 Manual Objectives

This manual describes in details Avalue Technology ECM-EHL-B1 Single Board.

We have tried to include as much information as possible but we have not duplicated information that is provided in the standard IBM Technical References, unless it proved to be necessary to aid in the understanding of this board.

We strongly recommend that you study this manual carefully before attempting to set up ECM-EHL-B1 or change the standard configurations. Whilst all the necessary information is available in this manual we would recommend that unless you are confident, you contact your supplier for guidance.

Please be aware that it is possible to create configurations within the CMOS RAM that make booting impossible. If this should happen, clear the CMOS settings, (see the description of the Jumper Settings for details).

If you have any suggestions or find any errors regarding this manual and want to inform us of these, please contact our Customer Service department with the relevant details.

1.5 System Specifications

System	
CPU	Onboard Intel® Pentium®/Celeron®/Atom™ SoC BGA Processor (Elkhart Lake Platform 4.5~12W)- (with CPU Bottom Mounted) Intel® Celeron® J6412 processer, Quad core,2.0GHz,10W Intel® Celeron® J6413 processer, Quad core,1.8GHz,10W Intel® Pentium® J6426 processer, Quad core,2.0GHz,10W Intel® Celeron® N6210 processer, Dual core,1.2GHz,6.5W Intel® Atom® x6211E processer, Dual core,1.3GHz,6W Intel® Atom® x6413E processer, Quad core,1.5GHz,9W Intel® Atom® x6425E processer, Quad core,2.0GHz,12W Intel® Atom® x6425RE processer, Quad core,1.9GHz,12W Intel® Atom® x6414RE processer, Quad core,1.5GHz,9W
BIOS	AMI BIOS, 256Mbit SPI Flash ROM
System Chipset	Elkhart lake SoC integrated
I/O Chip	EC ITE IT5571
System Memory	Single 260-pin DDR4 SODIMM Socket, Supports Up to 32GB DDR4 3200MTs SDRAM (non ECC Supported)
Watchdog Timer	H/W Reset, 1sec. ~ 65535sec and 1sec. or 1min./step
H/W Status Monitor	CPU & system temperature monitoring Voltages monitoring
TPM	TPM 2.0 NuvoTon_NPCT750AADYX(for standard temp) & NPCT754AADYX(for extend temp) co-lay Infineon_SLB9670VQ2.0 Default is NuvoTon
Expansion Slot	
M.2	1 x M.2 Key-B 2242/3042, (PCIex2) or (PCIex1+USB3.1 GEN 1) or (SATAIII + USB 3.1 GEN1), USB2.0, with SIM Slot for SSD/LTE. *Default is PCIex1/SATAIII+USB3.1 GEN1 1 x M.2 (Key-E, 2230, PCIex1, USB2.0)
Storage	
M.2	1 x M.2 (Key-B, 2242)
SATA Interface	1 x SATA III
Edge I/O	
COM	1 x 2 x 3pin (2.0mm) for RS422/485 switch by GPIO 1 x D-SUB9 RS232
LAN	2 x RJ45 (Independent)

USB 2.0	2 x USB 2.0 (Dual Deck, Type A)
USB 3.1	2 x USB 3.1 Gen.2 (Dual Deck, Type A)
DP	1 x DP 1.2 (Dual Deck with HDMI)
HDMI	1 x HDMI 2.0b (Dual Deck with DP)
LED Indicator	2 x LED for Power and Data Access (Dual Deck)
Onboard I/O	
COM	3 x 2x5pin (2.0mm) for 3xRS232(COM2/3/4)
USB 2.0	1 x 2x5-Pin Header (2.0mm) for USB2.0
GPIO	1 x 2x6-Pin Header (2.0mm) for 8-bit GPIO, SMBUS, +5V, GND
SATA Power	1 x 2-Pin Wafer (2.0mm) for 5V Power SATA Power
CPU/System FAN	1 x 4-Pin Header Connector (2.54mm) for Smart Fan
Buzzer	1 x 2-Pin Wafer (2.0mm)
Front Panel	1 x 2x5-Pin Header (2.00mm)
RTC Battery	1 x 2-Pin Wafer (1.25mm) CR2032X
AT/ATX Selector	1 x 3-Pin Header (2.0mm), Default is AT
Clear CMOS	1 x 3-Pin Header (2.0mm)
eDP	1 x 2x10 pin wafer(1.25mm)
LCD Backlight Brightness	1 x 3-Pin Header (2.0mm)
LCD Inverter	1 x 5-Pin Wafer (2.0mm)
eSPI	1 x 2 x 6-Pin Header (1.27mm)
Audio	1 x 2x6-Pin Header (2.0mm) for Line-In, Line-Out, Mic-In
DC-Input	1 x 2 x 2-Pin 180D Connector (4.2mm)
Display	
Graphic Chipset	Intel® UHD Graphics
Spec. & Resolution	HDMI 2.0b Max resolution 4096x2160@60Hz DP 1.2 Max resolution 4096x2160@60Hz eDP1.3 Max resolution 4096x2160@60Hz
Multiple Display	Triple Display
Audio	
Audio Codec	Realtek ALC888S Audio Codec (co-lay ALC897, default ALC888S)
Interface	Mic-In, Line-In, Line-Out in pin header
Ethernet	
LAN Chipset	Intel® I226LM for standard temperature Intel® I226IT for extend temperature
LAN Spec.	10/100/1000/2.5G Base-Tx GbE compatible
Interface	2 x RJ45
Mechanical & Environmental Specification	

Power Requirement	Typical 12/24Vdc (+9~ 36Vdc)
ACPI	Single power ATX Support S0,S3, S4, S5 ACPI 5.0 Compliant
Power Mode	AT/ATX (Default Setting: AT)
Operating Temp.	Operating Standard: 0°C ~ 60°C with 0.5m/s air flow Conditional extend: -40°C ~ 85°C with 0.5m/s air flow.
Storage Temp.	-40°C ~ 85°C (-40°F ~ 185°F)
Operating Humidity	40°C @ 95% Relative Humidity, Non-condensing
Size (L x W) (Please consult product engineers for the production feasibility if the size is larger than 410x360mm or smaller than 80x70mm)	5.7" x 4" (146mm x 101mm)
Weight	0.44lbs (0.2kg)
Vibration Test	1.5Grms, IEC 60068-2-64, Random, 5 ~ 500Hz, 30min/Axis, 3 Axis
Shock Test	10G, IEC 60068-2-27, Half Sine, 11ms, Z Axis
Drop Test	ISTA 2A, IEC-60068-2-32 Test : Ed, 1 Corner, 3 Edges, 6 Faces
OS Information (listed in accordance with Intel document)	Win 10 Linux

Note: Specifications are subject to change without notice.

User condition suggestion:
1. RealTek ALC888S-VD2-GR IC specification Operating Temp Range 0°C ~+70°C.

2.2 Jumper and Connector List

You can configure your board to match the needs of your application by setting jumpers. A jumper is the simplest kind of electric switch.

It consists of two metal pins and a small metal clip (often protected by a plastic cover) that slides over the pins to connect them. To "close" a jumper you connect the pins with the clip. To "open" a jumper you remove the clip. Sometimes a jumper will have three pins, labeled 1, 2, and 3. In this case, you would connect either two pins.

The jumper settings are schematically depicted in this manual as follows:

A pair of needle-nose pliers may be helpful when working with jumpers.

Connectors on the board are linked to external devices such as hard disk drives, a keyboard, or floppy drives. In addition, the board has a number of jumpers that allow you to configure your system to suit your application.

If you have any doubts about the best hardware configuration for your application, contact your local distributor or sales representative before you make any changes.

The following tables list the function of each of the board's jumpers and connectors.

Jumpers

Label	Function	Note
JRI1	Serial port 1 pin9 signal select	3 x 2 header, pitch 2.00mm
JAT1	AT/ATX Input power select	3 x 1 header, pitch 2.00mm
JBAT1	Clear CMOS	3 x 1 header, pitch 2.00mm

Connectors

Label	Function	Note
JBKL1	LCD inverter connector	5 x 1 wafer, pitch 2.00mm Matching Connector: JST PHR-5
CPU_FAN1	CPU fan connector	4 x 1 wafer, pitch 2.54mm
COM1	Serial Port 1 connector	D-sub 9-pin, male Note：COM1 support RS422/485 by BIOS setting
J422_485	Serial port 1 in RS-422/485 mode	3 x 2 header, pitch 2.00 mm

JCOM2/3/4	Serial Port 2/3/4 connector	5 x 2 header, pitch 2.00mm
JDIO1	General purpose I/O connector	6 x 2 wafer, pitch 2.00mm
NGFF1	M.2 KEY-B 2242/3042 connector	
NGFF2	M.2 KEY-E 2230 connector	
LED1	HDD/Power LED indicator	
JFP1	Front Panel connector	5 x 2 header, pitch 2.00mm
USB1	2 x USB3.1 connector	
USB2	2 x USB2.0 connector	
JUSB1	USB2.0 connector	5 x 2 header, pitch 2.00mm
JBZ1	PC Buzzer connector	2 x 1 wafer, pitch 2.00mm
LAN1	2 x RJ-45 Ethernet	
BT1	Battery connector	2 x 1 wafer, pitch 1.25mm
JAUDIO1	Audio connector	6 x 2 header, pitch 2.00mm
PWR1	Power connector	2 x 2 wafer, pitch 4.20mm
BIOS_SPI1	BIOS SPI connector	4 x 2 header, pitch 2.00mm
JEC_ROM1	EC Debug connector	3 x 1 header, pitch 2.00mm
SATA_PWR1	SATA Power connector	2 x 1 wafer, pitch 2.00mm
SATA1	Serial ATA connector	
DP_HDMI1	DP connector HDMI connector	
SO_DIMM1	DDR4 SODIMM socket	
JPSE1	Cortex Debug + ETM connector	10 x 2 header, pitch 1.27mm
JESPI1	Port80 connector	6 x 2 header, pitch 1.27mm
JEDP1	eDP connector	10 x 2 wafer, pitch 1.25mm
USIM1	SIM card slot

MIC1-JD	MIC IN (MIC_RIN/LIN) sense pin

3.BIOS Setup

3.1 Introduction

The BIOS setup program allows users to modify the basic system configuration. In this following chapter will describe how to access the BIOS setup program and the configuration options that may be changed.

3.2 Starting Setup

AMI BIOS™ is immediately activated when you first power on the computer. The BIOS reads the system information contained in the NVRAM and begins the process of checking out the system and configuring it. When it finishes, the BIOS will seek an operating system on one of the disks and then launch and turn control over to the operating system.

While the BIOS is in control, the Setup program can be activated in one of two ways:
By pressing <ESC> or <Del> immediately after switching the system on, or
By pressing the < ESC> or <Del> key when the following message appears briefly at the left-top of the screen during the POST (Power On Self Test).

Press <ESC> or <Del> to enter SETUP

If the message disappears before you respond and you still wish to enter Setup, restart the system to try again by turning it OFF then ON or pressing the "RESET" button on the system case. You may also restart by simultaneously pressing <Ctrl>, <Alt>, and <Delete> keys.

3.3 Using Setup

In general, you use the arrow keys to highlight items, press <Enter> to select, use the PageUp and PageDown keys to change entries, press <F1> for help and press <Esc> to quit. The following table provides more detail about how to navigate in the Setup program using the keyboard.

Button	Description
↑	Move to previous item
↓	Move to next item
←	Move to the item in the left hand
→	Move to the item in the right hand
Esc key	Main Menu -- Quit and not save changes into NVRAM Status Page Setup Menu and Option Page Setup Menu -- Exit current page and return to Main Menu
+ key	Increase the numeric value or make changes
- key	Decrease the numeric value or make changes
F1 key	General help, only for Status Page Setup Menu and Option Page Setup Menu
F2 key	Previous Values
F3 key	Optimized defaults
F4 key	Save & Exit Setup

- **Navigating Through The Menu Bar**

   Use the left and right arrow keys to choose the menu you want to be in.

   Note: Some of the navigation keys differ from one screen to another.

- **To Display a Sub Menu**

   Use the arrow keys to move the cursor to the sub menu you want. Then press <Enter>.   A "➢" pointer marks all sub menus.

3.4 Getting Help

Press F1 to pop up a small help window that describes the appropriate keys to use and the possible selections for the highlighted item. To exit the Help Window press <Esc> or the <Enter> key again.

3.5 In Case of Problems

If, after making and saving system changes with Setup, you discover that your computer no longer is able to boot, the AMI BIOS supports an override to the NVRAM settings which resets your system to its defaults.

The best advice is to only alter settings which you thoroughly understand. To this end, we strongly recommend that you avoid making any changes to the chipset defaults. These defaults have been carefully chosen by both BIOS Vendor and your systems manufacturer to provide the absolute maximum performance and reliability. Even a seemingly small change to the chipset setup has the potential for causing you to use the override.

Once you enter the Aptio Setup Utility, the Main Menu will appear on the screen. The Main Menu allows you to select from several setup functions and exit choices. Use the arrow keys to select among the items and press <Enter> to accept and enter the sub-menu.

3.6.1 Main Menu

This section allows you to record some basic hardware configurations in your computer and set the system clock.

3.6.1.1 System Language

This option allows choosing the system default language.

3.6.1.2 System Date

Use the system date option to set the system date. Manually enter the day, month and year.

3.6.1.3 System Time

Use the system time option to set the system time. Manually enter the hours, minutes and seconds.

Note: The BIOS setup screens shown in this chapter are for reference purposes only, and may not exactly match what you see on your screen.

Visit the Avalue website (www.avalue.com.tw) to download the latest product and BIOS information.

3.6.2 Advanced Menu

This section allows you to configure your CPU and other system devices for basic operation through the following sub-menus.

```
                          Aptio Setup – AMI
        Main  Advanced  Chipset  Security  Boot  Save & Exit

▶ CPU Configuration                          CPU Configuration Parameters
▶ Power & Performance
▶ PCH-FW Configuration
▶ Trusted Computing
▶ ACPI Settings
▶ EC 5571 HW monitor
▶ NCT5124DSEC Super IO Configuration
▶ S5 RTC Wake Settings
▶ Serial Port Console Redirection
▶ USB Configuration
▶ Network Stack Configuration
▶ NVMe Configuration

                                             →←: Select Screen
                                             ↑↓: Select Item
                                             Enter: Select
                                             +/-: Change Opt.
                                             F1: General Help
                                             F2: Previous Values
                                             F3: Optimized Defaults
                                             F4: Save & Exit
                                             ESC: Exit

```

Item	Options	Description
CPU Flex Ratio Override	Disabled**[Default]** Enabled	Enable/Disable CPU Flex Ratio Programming.
Intel (VMX) Virtualization Technology	Disabled Enabled**[Default]**	When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology.
Active Processor Cores	All**[Default]** 1 2 3 4 5 6 7 8	Number of cores to enable in each processor package.

3.6.2.2 Power & Performance

3.6.2.2.1 CPU – Power Management Control

Item	Option	Description
Intel® SpeedStep™	Enabled**[Default]**, Disabled	Allows more than two frequency ranges to be supported.
Intel® Speed Shift Technology	Enabled**[Default]**, Disabled	Eanble/Disable Intel® Speed Shift Technology support. Enabling will expose the CPPC v2 interface to

		allow for hardware controlled P-states.
Turbo Mode	Enabled**[Default]**, Disabled	Enable/Disable processor Turbo Mode (requires Intel Speed Step or Intel Speed Shift to be available and enabled).
C States	Enabled**[Default]**, Disabled	Enable/Disable CPU Power Management. Allows CPU to go to C states when it's not 100% utilized.

3.6.2.2.1.1 View/Configure Turbo Options

Item	Option	Description
Energy Efficient P-state	Disabled Enabled**[Default]**	Enable/Disable Energy Efficient P-state feature. When set to 0, will disable access to ENERGY_PERFORMANCE_BIAS MSR and CPUID Function 6 ECX[3] will read 0 indicating no support for Energy Efficient policy setting. When set to 1 will enable access to ENERGY_PERFORMANCE_BIAS MSR 1B0h.
Energy Efficient Turbo	Disabled Enabled**[Default]**	Enable/Disable Energy Efficient Turbo Feature. This feature will opportunistically lower the turbo frequency to increase efficiency. Recommended only to disable in overclocking situations where turbo frequency must remain constant. Otherwise, leave enabled.

3.6.2.2.2 GT – Power Management Control

```
                              Aptio Setup - AMI
        Advanced

  GT - Power Management Control                         Check to enable render standby
                                                        support.
  RC6(Render Standby)              [Enabled]
  Maximum GT frequency             [Default Max Frequency]
  Disable Turbo GT frequency       [Disabled]

                                                        →←: Select Screen
                                                        ↑↓: Select Item
                                                        Enter: Select
                                                        +/-: Change Opt.
                                                        F1: General Help
                                                        F2: Previous Values
                                                        F3: Optimized Defaults
                                                        F4: Save & Exit
                                                        ESC: Exit

```

Item	Options	Description
Legacy USB Support	Enabled**[Default]**, Disabled Auto	Enables Legacy USB support. AUTO option disables legacy support if no USB devices are connected. DISABLE option will keep USB devices available only for EFI applications.
XHCI Hand-off	Enabled**[Default]**, Disabled	This is a workaround for OSes without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver.
USB Mass Storage Driver Support	Disabled Enabled**[Default]**,	Enable/Disable USB Mass Storage Driver Support.
USB transfer time-out	1 sec 5 sec 10 sec 20 sec**[Default]**	The time-out value for Control, Bulk, and Interrupt transfers.
Device reset time-out	10 sec 20 sec**[Default]** 30 sec 40 sec	USB mass storage device Start Unit command time-out.
Device power-up delay	Auto**[Default]**	Maximum time the device will take before it

	Manual	properly reports itself to the Host Controller. 'Auto' uses default value: for a Root port it is 100ms, for a Hub port the delay is taken form Hub descriptor.
Mass Storage Devices	Auto**[Default]** Floppy Forced FDD Hard Disk CD-ROM	Mass storage device emulation type. 'AUTO' enumerates devices according to their media format. Optical drives are emulated as 'CDROM', drives with no media will be emulated according to a drive type.

3.6.2.11 Network Stack Configuration

Item	Options	Description
Network Stack	Enabled Disabled**[Default]**	Enable/Disable UEFI Network Stack.

3.6.2.12 NVMe Configuration

```

3.6.3.2.2 SATA Configuration

Item	Options	Description
SATA Controller(s)	Enabled**[Default]** Disabled,	Enable/Disable SATA Device.
SATA Mode Selection	AHCI**[Default]**,	Determines how SATA controller(s) operate.
SATA Test Mode	Enabled Disabled**[Default]**	Test Mode Enable/Disable (Loop Back).
Aggressive LPM Support	Enabled Disabled**[Default]**	Enable PCH to aggressively enter link power state.
Port 0	Enabled**[Default]** Disabled	Enable or Disable SATA Port.
Spin Up Device	Enabled Disabled**[Default]**	If enabled for any of ports Staggerred Spin Up will be performed and only the drives which have this option enabled will spin up at boot. Otherwise all drives spin up at boot.
SATA Device Type	Hard Disk Drive Solid State Drive**[Default]**	Identify the SATA port is connected to Solid State Drive or Hard Disk Drive.
SATA Port 0 DevSlp	Disabled**[Default]** Enabled	Enable/Disable SATA Port 0 DevSlp. For DevSlp to work, both hard drive and SATA port need to support DevSlp function, otherwise an unexpected behaviour might happen. Please check board design before enabling it.

Port 1	Enabled**[Default]** Disabled	Enable or Disable SATA Port.
Spin Up Device	Enabled Disabled**[Default]**	If enabled for any of ports Staggerred Spin Up will be performed and only the drives which have this option enabled will spin up at boot. Otherwise all drives spin up at boot.
SATA Device Type	Hard Disk Drive Solid State Drive**[Default]**	Identify the SATA port is connected to Solid State Drive or Hard Disk Drive.
SATA Port 1 DevSlp	Disabled**[Default]** Enabled	Enable/Disable SATA Port 1 DevSlp. For DevSlp to work, both hard drive and SATA port need to support DevSlp function, otherwise an unexpected behaviour might happen. Please check board design before enabling it.

3.6.3.2.3 USB Configuration

```

```

Item	Option	Description
Secure Boot	Disabled**[Default]** Enabled	Secure Boot feature is Active if Secure Boot is Enable, Platform Key(PK) is enrolled and the System is in User mode. The mode change requires platform reset.
Secure Boot Mode	Standard Custom**[Default]**	Secure Boot mode selector: Standard/Custom. In Custom mode Secure Boot Variables can be configured without authentication.

3.6.4.1.1 Key Management

Item	Option	Description
Factory Key Provision	Disabled**[Default]** Enabled	Install factory default Secure Boot keys after the platform reset and while the System is in Setup mode.

3.6.5   Boot

Item	Option	Description
Setup Prompt Timeout	1~ 65535	Number of seconds to wait for setup activation key. 65535(0xFFFF) means indefinite waiting.
Bootup NumLock State	On**[Default]** Off	Select the keyboard NumLock state
Quiet Boot	Disabled**[Default]** Enabled	Enables or disables Quiet Boot option
Fast Boot	Disabled**[Default]** Enabled	Enables or disables boot with initialization of a minimal set of devices required to launch active boot option. Has no effect for BBS boot options.
Boot Option #1/#2	Set the system boot order.	

3.6.6 Save and exit

3.6.6.1 Save Changes and Reset

Reset the system after saving the changes.

3.6.6.2 Discard Changes and Reset

Any changes made to BIOS settings during this session of the BIOS setup program are discarded. The setup program then exits and reboots the controller.

3.6.6.3 Restore Defaults

This option restores all BIOS settings to the factory default. This option is useful if the controller exhibits unpredictable behavior due to an incorrect or inappropriate BIOS setting.

4. Drivers Installation

Note: Installation procedures and screen shots in this section are for your reference and may not be exactly the same as shown on your screen.

4.1 Install Chipset Driver

All drivers can be found on the Avalue Official Website:

http://www.avalue.com.tw.

Note: The installation procedures and screen shots in this section are based on Windows 10 operation system. If the warning message appears while the installation process, click Continue to go on.

Step 3. Click **Install**.

Step1. Click **Next**.

Step 4. Setup completed.

Step 2. Click **Accept**.

4.2 Install ME Driver

All drivers can be found on the Avalue Official Website:

http://www.avalue.com.tw.

Note: The installation procedures and screen shots in this section are based on Windows 10 operation system. If the warning message appears while the installation process, click Continue to go on.

Step 3. Click **Next** to continue installation.

Step1. Click **Next** to start installation.

Step 4. Click **Finish** to complete setup.

Step 2. Click **Next**.

4.3 Install VGA Driver

All drivers can be found on the Avalue Official Website:

**http://www.avalue.com.tw**.

**Note:** The installation procedures and screen shots in this section are based on Windows 10 operation system.

Step 3. Click **Start**.

Step 1. Click **Begin installation**.

Step 4. Click **Finish** to complete setup.

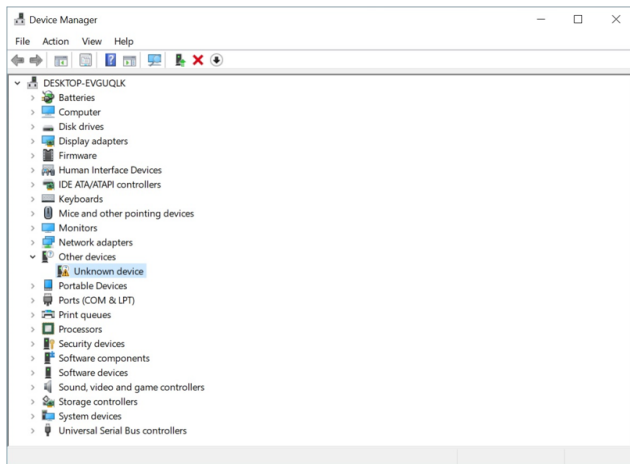

Step 2. Click **Next**.

4.4 Install Display Audio Driver

All drivers can be found on the Avalue
Official Website:
http://www.avalue.com.tw.

Note: The installation procedures and
screen shots in this section are
based on Windows 10 operation
system.

Step 3. Click **Next**.

Step 1. Click **Update Drivers**.

Step 4. Click **Next**.

Step 2. Click **Browse my computer for drivers**.

Step 5. Click **OK**.

Step 6. Click **Next**.

Step 7. Click **Yes**.

Step 8. Install complete.

4.5 Install Ethernet Driver

All drivers can be found on the Avalue
Official Website:
http://www.avalue.com.tw.

> **Note:** The installation procedures and
> screen shots in this section are
> based on Windows 10 operation
> system.

**Step 3.** Click **Next.**

Step 1. Click **Install Drivers and
Software** to continue installation.

Step 4. Click **Next.**

Step 2. Click **Next**.

Step 5. Click **Install**.

Step 6. Click **Finish** to complete setup.

4.6 Install HID Driver

All drivers can be found on the Avalue Official Website:

http://www.avalue.com.tw.

Note: The installation procedures and screen shots in this section are based on Windows 10 operation system.

Step 3. Click **Next.**

Step 1. Click **Next** to continue installation.

Step 4. Click **Finish** to complete setup.

Step 2. Click **Yes**.

4.7 Install SIO Driver

All drivers can be found on the Avalue Official Website:
http://www.avalue.com.tw.

Note: The installation procedures and screen shots in this section are based on Windows 10 operation system.

Step 1. Click **Unknown device** to continue installation.

Step 2. Click **Update driver**.

Step 3. Click **Search automatically for drivers**.
Step 4. Click **Next**.
Step 5. Install complete.
